

NAGARJUN MALLESH

FULLSTACK SOFTWARE ENGINEER

+91-8884912419
nagarjunmallesh7@gmail.com
Bangalore,KA, IN

FullStack Software Engineer with **3+** years of experience building scalable applications, complemented by bachelor's and master's degrees in **Computer Science** and **Information Systems**. Passionate about **AI**, system optimization, and solving complex problems with future-scalable architectures following **AWS Well-Architected** Framework principles. Recognized for excellence and impactful contributions in every role

EXPERIENCE

SYSTEMS ANALYST

ML Technologies LLC

July 2025 - Present

- **Tech Keywords:**
 - **Docker - GitHub Actions - AWS ECR - Pulumi (IaC) - VPC - EventBridge - Lambda - Serverless - AWS Bedrock - RAG - Amazon Nova Pro - API Gateway - Step Functions - OpenSearch - S3**
- **Experience:**
 - Created vehicle recovery system powered by AWS Bedrock Knowledge Base with S3 storage and OpenSearch vector database, implementing automated emergency assistance with location-based routing that improved emergency response coordination by 70%.
 - Designed an emergency services orchestration platform using API Gateway, Lambda functions, and Step Functions for automated service categorization, implementing real-time progress tracking and notification systems, streamlining emergency response workflows by 60%.

BACKEND SOFTWARE ENGINEER

Keelworks Foundation

July 2024 - Present

- **Tech Keywords:**
 - **Node.js - JWT - Google Drive API - Docker - GitHub Actions - AWS ECR - Pulumi (IaC) - VPC - EventBridge - Lambda - Serverless - React - Jest - React Testing Library - AWS Bedrock - RAG - Amazon Nova Pro - API Gateway - Step Functions - OpenSearch - S3 - RAGAS Framework**
- **Experience:**
 - Developed a scalable full-stack platform using Node.js, React, and AWS serverless architecture, supporting 5x user growth with 60% infrastructure cost reduction.
 - Built an AI-powered onboarding assistant with AWS Bedrock RAG pipeline and Amazon Nova Pro LLM, reducing volunteer onboarding time by 70%.
 - Engineered an automated deployment pipeline using Docker, GitHub Actions, and blue-green strategies, reducing release cycles from hours to minutes with 95% error reduction.
 - Implemented RAGAS framework solutions for AI model evaluation and guardrails, improving AI response accuracy by 45% and reducing hallucinations.

SOFTWARE ENGINEER

Hewlett Packard

October 2019 - July 2022

- **Tech Keywords:**

- React.js - Redux - Context API - Node.js - MongoDB - PowerShell - VBS - AWS - C# - Custom Hooks - State Management - SHA-256 - VM Management - Automation Testing

- **Experience:**

- Built enterprise management platform using React.js, Redux, and Node.js with MongoDB, improving load times by 35% and achieving 99.9% uptime.
- Developed BIOS configuration automation using PowerShell and VBS scripting with validation workflows, transforming week-long processes into 15-minute operations.
- Architected cloud-based OS deployment pipeline using AWS services and C# automation scripts, reducing provisioning time from days to hours with 98% success rate.
- Engineered automated manufacturing deployment system using Node.js with SHA-256 validation and VM management, enabling deployment of 1000+ units with full traceability.

ASSOCIATE SOFTWARE ENGINEER

Digital API Craft Pvt Ltd

July 2019 - October 2024

- **Tech Keywords:**

- **Node.js - PostgreSQL - React.js - Kafka - Redis - Golang - API Integration - Microservices**

- **Experience:**

- Migrated legacy banking system from monolithic to microservices architecture using Java Spring Boot and Kafka, improving deployment frequency by 300%.
- Built user services microservice with Spring Boot REST APIs and event-driven architecture, handling authentication and profile management with 99.8% reliability.
- Engineered transaction management system using distributed transaction patterns with Redis caching, processing 50,000+ daily transactions seamlessly.
- Developed domain provisioning service using Golang APIs with DNS pool integration and validation, automating domain generation and reducing manual errors by 90%.

SKILLS

- | | |
|---|--|
| <ul style="list-style-type: none">• Programming: Java, Python, C++, JavaScript, TypeScript• Web Development: React.js, SASS/SCSS, HTML5/CSS3, REST APIs• Backend & Frameworks: Node.js, Spring Boot, Django, Microservices• Cloud & DevOps: AWS, Azure, Docker, Kubernetes, CI/CD, Git, GitHub, GitLab• Databases: MySQL, PostgreSQL, MongoDB (NoSQL), ORM | <ul style="list-style-type: none">• Testing & Quality: Mocha, Chai, TDD, Jest, Debugging, Performance Optimization• CS Fundamentals: Data Structures, Algorithms, System Design• Development Methodologies: Agile, Scrum, DevOps• Other: Problem-solving, Adaptability, Continuous Learning |
|---|--|

EDUCATION

**MASTERS OF SCIENCE
INFORMATION SYSTEMS**
Northeastern University, 2022- 2024

**BACHELOR OF ENGINEERING
INFORMATION SCIENCE AND ENGINEERING**
Visveswaraya Technological University, 2015- 2019

NOTABLE PROJECTS

- Built a **multi-agent** travel planning system on **AWS Bedrock** with **Supervisor, Collaborator**, and **Helper Agents** using **Claude** and **Nova models**, deployed through **API Gateway** with real-time recommendation synthesis, reducing travel planning time by 80%.
- Engineered a concurrent text normalization system with multi-threaded backend architecture leveraging **AWS Bedrock LLM**, implementing intelligent grammar correction with batch processing capabilities, processing 10,000+ documents simultaneously with 95% accuracy.
- Created a mobile application platform deploying **Swift** and **SwiftUI** architecture, integrating **Firebase Authentication** with **CoreData** for secure data management.
