SUMMARY

Senior Full-Stack Engineer with 5+ years building production systems serving **50K+ daily users**. Led critical infrastructure projects at **HP Inc.**, designed **GenAI** solutions at scale, and architected serverless platforms processing millions of requests. Expert in distributed systems, **AI/ML** integration, and leading cross-functional teams to deliver measurable business impact.

EXPERIENCE

Senior Systems Analyst | ML Technologies LLC, Boston, MA | *Jul 2025 - Present*

- Architected GenAI vehicle recovery system using AWS Bedrock and OpenSearch, reducing emergency response time by 70%
- Spearheaded technical roadmap and mentored team of 3 engineers on GenAI integration
- Designed an emergency services platform with API Gateway/Lambda processing 150K+ monthly requests with 99.9% uptime

Backend Software Engineer | Keelworks Foundation, Boston, MA | *Jul 2024 - Jul 2025*

- **Directed** a cross-functional team of 4 engineers and QA to build a production RAG chatbot using AWS Bedrock, serving 10K+ volunteers and reducing AI hallucinations by 45% via the RAGAS framework
- Architected serverless platform handling 1M+ monthly events through EventBridge-Lambda workflows with 60% cost reduction
- Designed a blue-green deployment pipeline, reducing deployment time from 4 hours to 8 minutes with zero-downtime releases

Software Engineer | Hewlett-Packard Inc, Bangalore, India | *Oct 2019 - Jul 2022*

- **Led Global Automation:** Designed a PowerShell BIOS system deployed across eight teams, reducing 4-day processes to 15 minutes, eliminating 90% configuration errors
- **Built Management Platform:** Orchestrated cross-functional engineering and QA teams to architect React.js/Node.js dashboard
- **Owned Infrastructure Project:** Led AWS-based OS deployment automation, reducing provisioning from days to hours, deployed to 100K+ client machines
- Resolved critical production issues affecting 1000+ deployments within 24-hour SLAs, solutions adopted globally

Associate Software Engineer | Digital API Craft Pvt Ltd, Bangalore, India | *Jul 2019 - Oct 2019*

- Architected microservices migration for banking system using Spring Boot/Kafka, handling 50K+ daily transactions with 99.8% reliability
- Built a domain provisioning system using Golang with DNS integration, automating client onboarding, and reducing errors by 90%

SKILLS

Languages: Java (Spring Boot), Python, JavaScript/TypeScript, Node.js, Golang, PowerShell, C#

Cloud: AWS (Lambda, Bedrock, API Gateway, EventBridge), GCP, Docker, Kubernetes, Pulumi/Terraform

Data: MongoDB, PostgreSQL, Redis, Kafka, OpenSearch, DynamoDB

AI/ML: AWS Bedrock, RAGAS, LangChain, RAG Pipelines, OpenAI APIs, Vector Databases

EDUCATION

MS Information Systems | Northeastern University, Boston, MA | 2022-2024

BE Information Science & Engineering | Visvesvaraya Technological University, India | 2019

NOTABLE PROJECTS

- **Multi-Agent Travel Planning System:** Built an AWS Bedrock-powered platform with Claude/Nova models deployed via API Gateway, reducing travel planning time by 80%
- **Concurrent Text Normalization Engine:** Engineered a multi-threaded system with AWS Bedrock LLM processing 10,000+ documents simultaneously with 95% accuracy
- **AI Travel Matching Platform:** SpringBoot application with Binary Search Tree algorithms and OpenAI integration, serving 500+ users with 85% satisfaction
