PROFESSIONAL EXPERIENCE

Senior Software Engineer | Flipkart | Bengaluru, India | 2018-2024

- Designed and implemented a high-throughput order-routing engine processing 2L+ orders/day with 99.95% uptime during Big Billion Days
- Re-architected the notifications service from a monolith to event-driven microservices using Kafka, reducing average delivery latency from 5s to 1.5s
- Drove adoption of gRPC-based inter-service contracts across 15 teams, reducing integration defects by 45% and onboarding time for new services

Software Engineer | Infosys | Pune, India | 2015-2018

- Delivered 3 client projects (banking, retail, logistics) on time using Java Spring Boot, meeting all SLA commitments.
- Optimised SQL query plans for a reporting module, reducing average query time from 12s to 1.4s.
